Final-year CSE Student | AI Researcher | Backend & ML Developer

Motivated and research-driven Computer Science undergraduate with hands-on experience across AI, full-stack development, and backend systems. Delivered 10+ end-to-end projects, presented at national conferences, and contributed to research at IIT Roorkee and MNNIT. Seeking opportunities in data-centric or backend roles where AI meets production systems.

💡 Skills

Languages: Python, Java, C++, JavaScript
AI/ML: TensorFlow, Scikit-learn, Pandas, NumPy, LSTM, ARIMA, Prophet, OpenCV, ViT, TF-IDF
Frameworks: Flask, Apache, Jupyter, Gemini API, Google Colab
Databases: MySQL, MongoDB
Web Stack: HTML, CSS, JavaScript, Chart.js, Java Servlet, JSP
Concepts: REST APIs, Data Pipelines, Feature Engineering, Model Evaluation, Agile, Git

---

Projects (Selected)

Amazon Stock Price Prediction — *Forecasting (2025)*
Developed hybrid LSTM, ARIMA, GRU, and Transformer models for time-series forecasting. Achieved RMSE of 0.03285 using Python. Designed a custom TimeSeriesTransformer with multivariate support.

Fake News Detection | IIT Roorkee — *ML Research (2025)*
Built an ML-powered Flask web app with TF-IDF + Random Forest, achieving 87% validation accuracy. Presented at SocProS 2025.

Fog Detection via Hybrid DL Models — *Computer Vision (2024)*
Trained dual CNN and ViT models on FRIDA2; achieved a 15% boost in accuracy on real-world haze datasets. Integrated OpenCV for real-time inference.

Retail Dashboard: Vishleshan — *Full Stack (2023)*
Created Flask + MySQL dashboard visualizing sales trends with Chart.js. Presented to 200+ industry experts at Bennett University showcase.

FIR Legal Assistant – LexHack — *Hackathon Winner (2025)*
Built FIR lodging tool using Flask, Google Maps API, and Gemini AI. Awarded “Innovation & Impact” by panel.

Depression Detection via Facial Cues — *AI4SocialGood (2024)*
Used CNN + OpenCV for facial classification with 82% accuracy. Live deployment via Flask.

Room Allocation Tool — *Java + MySQL (2023)*
Desktop GUI for 100+ students with auto-allocation and DB sync. Reduced manual work by 95%.

🧪Internships & Research

Software Intern – MNNIT Allahabad (2024)
Created REST APIs for academic services in Flask; enhanced backend throughput by 20%. Collaborated in Agile sprints.

Blockchain in Autonomous Vehicles – Bennett University (2024)
Simulated blockchain protocols; reduced spoofing risks by 35% in test environments.

Fake News Detection – IIT Roorkee (2025)
ML pipeline + Flask interface using TF-IDF, Random Forest. Publicly presented at SocProS.

📜Certifications

- NVIDIA: Fundamentals of Deep Learning
- IBM: Machine Learning, Generative AI, AI Foundations
- Google: Intro to Generative AI, Google Data Analytics

🎓Education

B.Tech in Computer Science & Engineering, Bennett University, 2022–2026
CGPA: 8.09 / 10 (Till 5th Semester)

Senior Secondary (XII), CBSE – 92.4% – Maharshi Patanjali Vidya Mandir (2021)
Secondary (X), CBSE – 85.8% – Maharshi Patanjali Vidya Mandir (2019)
